

Amendments To the Claims

Claim 1 (Currently amended) A stable, handicapped accessible picnic table, comprising:
a generally flat horizontal table top having a longitudinal axis, an upper surface, a lower surface,
first and second ends, and first and second sides;
first and second leg supports for supporting the lower surface of the table top;
each leg support having a first ground engaging portion generally transverse to the longitudinal
axis of the table top and a second ground engaging portion generally parallel to the table
top and terminating in an upright seat supporting surface;
a seat structure of about the same length as the table top's longitudinal axis mounted to the seat
support surfaces; and
each of said first and second table top ends being open under its lower surface to allow
wheelchair access to the ends of said table top.

Claim 2 (Original): The picnic table of claim 1 wherein the first and second leg supports are
bent to avoid sharp right angle corners.

Claim 3 (Original): The picnic table of claim 1 wherein the leg supports are of steel frame
material.

Claim 4 (Original): The picnic table of claim 3 wherein the leg supports are steel tubing or
pipe of circular cross section.

Claim 5 (Original): The picnic table of claim 1 which has a first and second pair of similarly configured leg supports.

Claim 6 (Original): The picnic table of claim 1 wherein the top and seats are dimensional wood planks.

Claim 7 (Original): The picnic table of claim 1 wherein the top and seats are dimensional plastic planks.

Claim 8 (Original): The picnic table of claim 1 wherein the top and seats are extruded aluminum stadium planks.

Claim 9 (Original): The picnic table of claim 1 wherein the top and seats are constructed of vinyl coated fabricated expanded metal.

Claim 10 (Currently amended): The picnic table of claim 1 wherein the ~~metal~~table top and seats are constructed of perforated steel.

Claim 11 (Original): The picnic table of claim 1 wherein the ends of the table top and the ends of the seat structure dwell in the same vertical plane.
